## **Self-consistent Methods For Composites**

## DOWNLOAD HERE

From the contents- 1. Introduction. Self-consistent methods for scalar waves in composites. 2.1 Integral equations for scalar waves in a medium with isolated inclusions. 3.1 Integral equations for electromagnetic waves. 4. Axial elastic shear waves in fiber reinforced composites. 5. Diffraction of long elastic waves by an isolated inclusion in a homogeneous medium. 6. Effective wave operator for a medium with random isolated inclusions. 7. Elastic waves in a medium with spherical inclusions. A. Special tensor bases of four rank tensors. A.I E-basis. A.2 P-basis. A.3 Averaging the elements of the E and P-bases. A.4 Tensor bases of four-rank tensors in 2D-space. B . The Percus-Yevick correlation function. References. EAN/ISBN : 9781402069680 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Kanaun, S. K. - Levin, V. M.
