

Tools For High Performance Computing 2011

[DOWNLOAD HERE](#)

The proceedings of the 5th International Workshop on Parallel Tools for High Performance Computing provide an overview on supportive software tools and environments in the fields of System Management, Parallel Debugging and Performance Analysis. In the pursuit to maintain exponential growth for the performance of high performance computers the HPC community is currently targeting Exascale Systems. The initial planning for Exascale already started when the first Petaflop system was delivered. Many challenges need to be addressed to reach the necessary performance. Scalability, energy efficiency and fault-tolerance need to be increased by orders of magnitude. The goal can only be achieved when advanced hardware is combined with a suitable software stack. In fact, the importance of software is rapidly growing. As a result, many international projects focus on the necessary software.

EAN/ISBN : 9783642314766 Publisher(s): Springer, Berlin Discussed keywords:

High-Performance-Computing (HPC) Format: ePub/PDF Author(s): Brunst, Holger - Mller, Matthias - Nagel, Wolfgang E. - Resch, Michael M.
