These gigs have not been featured in previous methods of mine! These are my supplemental gigs which I haven't disclosed in any of my primary methods but I'm now bringing these gigs to the surface as valuable money makers!!! So, What the Hell Will I Be Doing? You'll be borrowing the skills from the kind souls on fiverr and selling to the big dogs who are willing to pay up to ONE HUNDRED times the asking price!!

This isn't about the small time pennies. Each method detailed in the report represents a viable and hugely profitable business which can be scaled up massively. It's only limit is reflective of the effort you put in. If you want five figures, then five figures are yours for the taking. If you think big and act big, you can

expose these gigs for their true worth with the evi-dence weighing heavy in your pocket!!
