

MP3 Ralph Van Blarcom - Appalachian Symphony

[DOWNLOAD HERE](#)

A mountain experience symphono-net. Natural environmental sounds with the total keyboard experience. Imagine and be there. 8 MP3 Songs ELECTRONIC: Virtual Orchestra, NEW AGE: Environmental Details: To sum it up in a nut shell; I was a rock guitarist during my teens and twenties and that has always been my instrument of choice. Although, keyboards have always fascinated me, so, I started experimenting for a number of years in the school of self teaching. Now at 58 years young, I record and produce all of my material and have written over 100 songs on 20 CD's. This is the first time I have ever attempted to do this type of material. I thank my friends and family for the push. The CD "Appalachian Symphony" is based on my many years of wonderlust in the Appalachian Mountains and is a very personal, heart felt composition. Those who have experienced the mountains can relate to all of the musical experiences presented on this cd. Those who have not, well I have plenty of imagination to go around.
