I'm a former DJ turned artist who discovered a passion for house and techno music back in the 90's. I then turned to producing my own music about 5 years ago. I taught myself about music by reading books and by practicing. I was mainly influenced by Little Louis Vega, and Cajmere but it was also due to many nights in all kinds of places in New York City. I now call Virginia my home. I released my first CD in August 2006 (Caliber). This is my second album and I hope you will enjoy it. Thank you all, DJ Longshot
