a collection of ocean and cosmic soundscapes appropriate for meditation, yoga, relaxation and various healing techniques. Relax as the waves of sound wash over you as you dive into the deep blue sea complete with whale song, breezes from passing stingray 7 MP3 Songs ELECTRONIC: Ambient, EASY LISTENING: Mood Music Details: What would it feel like to immerse your soul into song? Elektrus presents Resurface, a collection of ocean and cosmic soundscapes appropriate for meditation, yoga, relaxation and various healing techniques. Relax as the waves of sound wash over you as you dive into the deep blue sea complete with whale song, breezes from passing stingrays and encapsulated air escaping to the world above. Experience bliss as the music engulfs your body, bringing you back to your beginnings. Reconnect with the sensation of floating in your mother's womb or even further connect with the primordial organism that is our evolutionary ancestor. Resurface takes you deep within your own mind and then gently brings you back up to a dark starlit night. Your next explorations lead you to the planets and stars circling in our cosmos. You begin to feel lighter than air, floating deeper into relaxation. While at times blatantly digital but also overwhelmingly organic, Elektrus blends our world with the next creating a complex combination of sounds which are difficult to describe and much easier to feel.
