Warm electropop made with real analog synthesizers. 12 MP3 Songs POP: Synth Pop, ELECTRONIC: Synthpop Show all album songs: Euromantique Songs Details: Euromantique is the second album from America's premiere analog electropop duo Ganymede. The 10 original songs fulfill the promise of the critically-acclaimed lead-off single "Neon Rain," setting Ganymede's trademark hook-laden electropop anthems against an evocative, throbbing synthetic backdrop. The CD also features 2 bonus remixes, the first by the talented Australian duo ElectroSquad, the second by the popular goth band the Cruxshadows. Euromantique was released by Ninthwave Records in late May 2001, to coincide with Ganymede's performance at SynthCon in Hollywood, CA. Since its release, Euromantique has been praised as some of the best electropop of the modern scene. It has garnered radio and club play all over the world and continues to introduce new fans to the Ganymede sound.
