Mark Doran didn't start recording these CD's until he was diagnosed with cancer in 2001. A lifelong musician, he had played in rock bands, wrote and played on other musicians CD's, but never tried a solo project until now. Like his inspiration Lance Armstrong, Mark Doran was diagnosed with testicular cancer. The cancer was spreading, surgery and chemotherapy was only way to save his life. During the four months of treatments, the idea of recording his original songs came about. He recalls, " I had just got through reading Lance Armstrongs book and decided that if he could survive and have such great success winning the tour de france, I could survive to record my original music. I feel really lucky to have had Lance as a role model. Even during the darkest days of my battle with cancer, I knew that everyday was an opportunity to know love, see beauty, write songs. Everyday is a blessing!. Mark Doran called on his friend, musician/producer Mark J. Dye and two musicians started to record his original music. All the music and vocals on these

CD's are done by this incredible duo. He comments, " Even though I write all the lyrics and music, after I play the guitar parts, Mark Dye writes the arrangements and plays all the other instruments . When we started to work together at the studio. I would just play the song on an acoustic guitar and we would talk about some ideas. It was important that the song could stand alone with just an acoustic guitar and vocals. Building the sound around that basic core has giving us the common formula to recording music .He's brought so much to my music that I have to thank him for sharing his gifts with me.We are a great team and work well together. One way we describe it is that, I bake the cake,he decorates it and we hope that the listener will eat it up ! " Many in the music industry would agree that their approach is delicious. It is with little wonder that with life-long musical influences including the Beatles, Joni Mitchell, Paul Simon,Led Zeppelin and other classic greats.
