Scarth Locke's second cd, HOLD ON, LET GO picks up where his first, THUNKADELICATE, left off, but amplifies and hones the direction. You'll still find Scarth's signature blend of low- and hi-fi sounds, and that unmistakable vibehumble, spastic, heartfelt, and sly but it arrives with more punch than before. From the artist: I was sitting on the porch, one summer day and playing my casio keyboard along with Herbie Hancock's Headhunter when I realized: I will be playing music for the rest of my life. It dawned on me with the force and certainty of the sun rising, Later things would become a little clearer. I would be writing songs for the rest of my life, which I think I like better. The thrill of hearing a new song that speaks to me in some unexpected way is like finding a room in your house you didn't know was there, or meeting someone for the first time whom you feel like you already know. There are a million metaphors, I suppose. Right. So, about me: I got born, realized I didn't want to be like my parents, hung out with the radio in high school, spent hours trying to learn songs by the Smiths and Tears for Fears and Billy Joel and Howard Jones on the piano, went to college, went to India for 6 years, where I started a center with my friends, Mark and Dara. Then I met Karina and we left India. At first, I wrote songs to document broken hearts and other discoveries, then it became something like a diary, and somewhere along the line, I just started to really love the art of it. And that's just my side. When I share music and find people who feel like I do about it, what a feeling. People who are interested in Beck They Might Be Giants The Postal Service should consider this download.
