

## Mp3 Tj Brown - Loves' Design

[DOWNLOAD HERE](#)

Smooth vocals, melodic harmony. And songs that tell a story which each note. 15 MP3 Songs  
URBAN/R&B: Neo-Soul, JAZZ: Smooth Jazz Show all album songs: Loves' Design Songs Details: I  
HEAR MUSIC IN MY HEAD There have been times when I could not sleep because a lyric or a melody  
would be in my head These are the words of singer-songwriter T.J. Brown. T.J. says this has been going  
on since the age of five. I would be in my room making up a melody with complete lyrics and harmonies  
and turn it over in my head T.J. says. Born as Tanya Jenine Brown and raised in Chicago IL, T.J. went  
through much of her adult life not taking her talent too seriously. I knew I could sing, she says, But I felt  
much more comfortable singing at weddings, church, or being a session singer in the studio."A local  
producer, and now one of her best friends Darell DEE BEST Bester gave her a deeply spiritual and  
moving song called Dreamin that changed her outlook on things. I figured I was always happy in the  
company of music, in everything I do music has to be involved. However, it has not been easy and there  
have been a lot of rough times, but T.J. finally believes her day has come. On her debut CD LOVES  
DESIGN there is a combination of slow melodic love making tunes with deep lyrical content. In LOVES  
DESIGN the title track, T.J. expresses her desire to be taken away to another space and time which  
brings about the crazy, euphoric feeling of being in love. In WHY U WANNA LEAVE ME? T.J. tells the  
story of a woman doing everything for her man but still loses him anyway I write totally from experience  
because that is the only true way I can express myself through my art she says. Every stage I have gone  
through, every love-feeling, whether its craziness, sadness, or happiness has left an affect on me. These  
are true with the other joints on the CD as well. Be it soft, melodic, or hypnotic, for every aspect of these  
songs, for every aspect of love there is a "design" ... LOVES DESIGN". So get ready to wrap your ears  
around music therapy for the heart.
