Power and Energy - 2-3 part Western Harmony - Exciting Instrumentals - Great new Songs. 14 MP3 Songs COUNTRY: Cowboy, COUNTRY: Western Show all album songs: Ghosts of Tombstone Songs Details: Introducing eight original songs about the West - six of them by songwriter extraordinaire, Trails Rails' bass-playing Bruce Huntington - as well as two Les Buffham (Yes, the one and only, Les Buffham)/Walt Richards collaborations. The title track, "Ghosts of Tombstone", written by Bruce and sung by Walt, was chosen to open the 2007 Tombstone Music Festival. The 'spirited' tales of the song are enhanced by Ken's guitar and Walt's banjo. Another ghostly offering, "Cold Northern Wind", has a different (and just as intriguing) story to tell. Guest vocalist, Ken Graydon joins us to sing one of his most requested songs, "Windmill". Ken's version was recorded on tape in 1983 and is not readily available. We think the song (and Ken) deserve a wide audience - we're happy to include them on this CD. "Below the Kinney Rim" (more Les Buffham lyrics - with tune by Mike Fleming) is destined to become a classic in it's own time. A number of artists have already recorded it. Do you like the mystery of a minor key? Try "Ten More Miles" and "San Miguel" - two unresolved stories that have several possible endings . . . Well, we could go on this way about each song. But enough about what We think! We hope you'll be able to take a few minutes to hear them for yourself - With Thanks to CDBaby for making this possible!
