If you like O.A.R. and the Eels, you will also like BBH's "Cheese on Wheat" which also reminds listeners of pixies, FIREHOSE and pavement with its raw guitars, extra solid rhythm section and super-catchy songs. 14 MP3 Songs ROCK: 90's Rock, POP: Quirky Details: Bernie Bernie Headflap started as a quartet at Ursinus College in August of 1992. "Cheese on Wheat" is their first cd, released by a small local label in 1995. Some of the band's favorite bands at that time were pixies, pavement. nirvana and FIREHOSE and all those influences can be heard as well as older favorites King Crimson and the Who. Songs "Xenophobe" and "Broken Room" received very good reviews from listeners at garageband.com, and other titles such as "Too Loud the Laughtrack" and "Christopher Walken" show primary lyricist Alan McCabe's wry sense of humor. You can read a review of this cd at the All Music Guide website.
