Weve teamed up with awarding-wining Touch-Tone Productions and Pajama Recording Studios to synergistically create todays hot new hits. As a cohesive family our mission is to cut and shape the diamond before it goes into that jewel box. Speech Music What is SpeechMusic? SpeechMusic is an evolutionary learning tool that enhances the listeners ability to focus, relax, process, and retain the vocal points presented in speeches/lectures. Speech Music can effect our feelings, energy levels, as well as our learning comprehension. Blaqueice Productions, the developers of Speech Music located in Anchorage, Alaska are owned and operated by Platinum Producers, Jae Logan Leonard Lawson, Jr. have developed a process that transforms flat, boring speeches into great entertaining speeches. We define this process as Musical Micro-Blasting, a process in which a musical

production engineer infuses select musical rhythms and beats to create a euphoric recall for all teaching and learning environments and applies to all ages. In addition, Musical Micro-Blasting utilizes an approach that focuses on the positive energy found in the keynote speakers tone, pitch, rhythm and delivery. After, we analyze and diagnose the speakers delivery through a designed computer analysis program which has been developed by Blaquelce Productions. We then uncover the speakers variable key range and frequency design and apply the corrective and select frequency placement by utilizing various instrumentation techniques. For example, we fuse the speakers voice with rhythmic nuances and precise undertone placement. When done correctly, this method produces a hypnotic effect on the listener, causing him/her to be able to intensely focus on the message being delivered. Research shows that music definitely transforms a persons learning comprehension by: establishing a positive learning state creating a desired atmosphere building a sense of anticipation energizing learning activities changing brain wave states focusing/concentration increasing attention improving memory facilitating a multisensory learning experience releasing tension enhancing imagination aligning groups developing rapport providing inspiration and motivation adding an element of fun accentuating theme-oriented units To explain it simply, Speech Music is a marriage between two of the most common communication vehicles used today; language and music. This, in turn, creates an unprecedented evolutionary forum for learning. Please direct all inquiries and comments to our email address (SPEECHMUSIC.COM@GMAIL.COM).
