"Pour 1 shot of Herbie Hancock and 1 shot of Radiohead over the Boston Pops, shake, drain into a Rocks glass, garnish with Moby, and you have a sexy, refreshingly original album." 16 MP3 Songs

ELECTRONIC: Trip Hop, NEW AGE: Ambient Details: Preview: Optimus Rob's debut album Mood Synth is placing him on the radar as one of music's most accessible electronic composers. He's building a name for his crossover acoustic-electronic hybrids of danceable textures and downtempo beats. From the label:

"It's music for your mood, music to make your mood - a Mood Synth." - Sonic Chronicle "Appearing from

the underground club scene with his debut album, Optimus Rob has combined polar opposites into

rhythmic medleys that circulate between electronica, funk, classical and pop." - Crown of Sound "His

ability to intersperse movement with sound has forged a new type of music - synthesis in the form its

creators had envisioned." - Attention Kid Deficit "Mood Synth could be listed equally in Pop, Rock,

Electronic, New Age, Funk, and Classical. Optimus Rob has blurred the lines between genres and

created music in a form accessible to an expanded sea of listeners." - Brokebeat Breaks From the artist:

"Put on this CD, put on your headphones and press play. It will take you from 8am to noon before you

realize it's still the same disc. I bring to you a year of my life, a year of my work, and a year of my

turbulent thoughts. Being able to express my feelings through music has given me a new appreciation for

the sensations we encounter everyday. I'm awaking every morning to a day that I love - and that's a new

feeling for me. I feel refreshed, open and excited about the future - and I know that I would not have

reached this place without the journey depicted in this album. It's a newer genre, an electronic fusion of

downtempo, ambient textures amidst organic rhythms. It's honest and pure. I'm 23 years old and am just

learning to listen to myself. Mood Synth soothes and excites your mind with a subtle ambience of melody

and rhythm - evolving into sounds not yet produced. I don't feel like I play one particular instrument - I

compose sound with a purpose and find a freeing comfort in that." - Optimus Rob
