

Mp3 Paradiso - Healing Vibes - Solo Didjeridoo (didgeridoo)

[DOWNLOAD HERE](#)

Amazing Solo Didjeridoo or Didgeridoo healing session using the Sound Current and Chakra frequencies, recorded with a 3-dimensional sound system. Produced by Suzanne Doucet Chuck Plaisance 13 MP3 Songs NEW AGE: Healing, NEW AGE: Meditation Details: Paradiso Paradiso founded "5th Element" (a holistic remedy and guidance entity) after receiving the gift of light and sound in 1997. Within that gift the Great Spirit guides him to transform these remedies into music. Paradiso was born in the Bay Area, California. He is a solo musician but also performs with bands. He has released five CD's so far: two CD's with the band 3D and Tajalli ("Vibe" and "Journey Into Shabad",) his own production ("Shaman's Trance",) a collaboration performing with keyboardist Gary Miraz ("Through Fields Of Stars) and "Healing Vibes" co-produced with with Suzanne Doucet Chuck Plaisance. Paradiso's music can balance the body, help release unwanted blockages, and shift people towards their life purpose. His mission is to inspire all of us to rediscover our oneness with each other, our environment, and all of creation. Paradiso's music carries the light of God and the vibration of the "sound current", a spiritual initiation he received through master musician Tajalli (his musical and spiritual mentor). This vibration flows through the instrument, into the music and out to the people. "Healing Vibes" was recorded in 3-D, to capture a live healing session with Paradiso, playing different didgeridoos each tuned to a frequency of the seven Chakras. Chuck Plaisance's recording system is designed to simulate human hearing, using a binaural head microphone to capture the depth, height, width, as well as directional movement. Therefore no special equipment is needed to get 3D sound from traditional stereo speakers. With speakers or headphones the experience is amazing. Close your eyes and feel Paradiso's healing vibes all around you.
