Details: Contrast is a new recording which features a wide variety of musical styles and composers. For years I have enjoyed the challenge of being involved in a variety of musical environments. This recording is an attempt to bring some of those elements (jazz, solo and chamber music) together into one place.

Featuring the music of David Burge, Miles Davis, Tadd Dameron, Guo Wen-Jing, John Lewis and Rusty Burge. Read the review at contemporarymusicprojectby Don Skoog "The vibraphone sings like never before on Contrast. Rusty's touch produces a montage of beautiful lines and thoughts that flow effortlessly across the instrument. He recreates the scope and possibilities of the vibraphone with each carefully performed nuance. Contrast is a landmark recording that champions a new era for vibraphone."
