"The Painter." song 5 on Painting Box Much of our work involves helping young minds succeed academically and developmentally. Rhythm stimulates cognitive function in young children. Repetitive motion and repetition of color names, numbers and letters develop memory skills. We proudly write songs for the Under 10 set. Colors, and Counting, Centipedes and Snails, Germs and Toenails are the foundation for our silly tales. We use music as a metaphor for rainbows and sunshine. Alliteration is second nature to us. We hope you enjoy listening to the 15 songs on Painting Box, and thanks for visiting us at CD Baby
