Beautiful, crystalline pop music punctuated by bubbling keyboards, syncopated afro-beats and spare, aching lyrics. 9 MP3 Songs in this album (28:34) ! Related styles: POP: Synth Pop, ROCK: Rock Roll People who are interested in Talking Heads Mates of State Casiotone for the Painfully Alone should consider this download. Details: Led by ex-Nueva Cat Jody Weinmann and Prairie Spy Ben Fong, the Spectacles make pop music dubbed blistering and totally endearing by The Gapers Block. Home is an impressive debut: punctuated by bubbling keyboards, syncopated afro-beats and spare, aching lyrics, it lives up to its comfortable title. The songs, which swing from the effervescent Byrne/Eno world rhythm of Slow Down Csilla to the heroic pop anthemics of And We Love Dessert, are well-crafted little slivers, drenched in reverb. Stand-out tracks touch on the unrequited love (Living Room) and teenage awkwardness (Outdated Model) that serve as the guiding theme for the album, but still manage to come off danceable and upbeat. NHeat, even features a mildly offensive house jam, providing an ass-shaking tribute to pregnancy.
