Eclectic Pop: memorable hooks compelling singing, with enhanced sensitivity dynamics 8 MP3 Songs
POP: Beatles-pop, ROCK: Psychedelic Details: Billy Dechand has a unique musical voice, both compositionally and vocally. His music is majestic and gentle, humorous and sad, catchy yet sophisticated, and very often beautiful. He fuses a keen sense of pop music, with its memorable hooks and strong, compelling singing, with the sensitivity, dynamics, and innovation of chamber music. His singing ranges from hall-filling bellows to aching whispers, always with a rich tone that has been compared to Elvis Costello's among others. Past and current recordings demonstrate a harmonic and melodic sense that is recognizable as distinctly his, even when performed by other musicians. This is Billy's strongest material yet -- it includes two songs with lyrics by poet Kate Lovelady. As always, his spectrum is grand, from an acoustic contemplative harmony heart melter to an end-of-the-world rock-sonic explosion.
