Related styles: EASY LISTENING: American Popular Song, POP: Quirky Details: Bob and Linda Penett have created Golf Amnesia, with the very capable talents of producer and guitar player Randy Bigness, to express some of the more humorous and quirkier aspects of recreational golf. There can be no other game on the planet that has anywhere near the number of circumstances and options one encounters while playing 18 holes. The variety of equipment and advice to succeed in the sport truly seems endless. Is it any wonder that a player can forget how many strokes he has attempted or the exact application of a rule or two? Anyone who has played a serious round has felt the heartache and frustration of the golf quagmire. You are at a beautiful place, with your best friends, and somehow the game turns your brain and stomach upside down. This the time to remember one of the Golf Amnesia tunes to help you get to your next great shot. Along with a sense of humor, another important aspect of golf is to Play the Truth. There are a lot of rules and some are definitely a little funky. But without a common denominator standard, there can be no genuine appreciation for a player's performance. Be able to play to your handicap. If you are going to tell someone what you shot, make sure it is accurate. It is much more enjoyable discussing your round over a cold one when everything was by the book.
