

Mp3 Dr. Jackie Gardner - Blu Blu Blues Iv

[DOWNLOAD HERE](#)

A collaborative creation of music inspired and shared through combinations of r&b, jazzy, and perky moderate tones. a talented effort by the artist, as a one-man band/recording artist, to share his musical talents with the universe. 10 MP3 Songs JAZZ: Smooth Jazz, URBAN/R&B: Rhythm Blues Details: Hello There: I am a one-man band. I provided the finance, sweat, and cheer without fear and did all of the other things that made this compact disc possible. Buy one or two and you will be donating to a cause and help me satisfy my tuition expense from recently obtaining a Ph.D. in Education from The Union Institute University. I grew to love music and singing when a child growing-up in the country. My mother sang frequently throughout the day while she worked and throughout the night without a microphone or any background music. She just sang whenever the spirit of God hit! I loved those times because mom sang very, very, very good. Her voice radiated through my life as it compelled me to sing as well. I started singing in Church, then learned and played several musical instruments in the high school band. I sing whenever or where ever I am as my Mom did. Now, I enjoy playing keyboard, singing, recording, and producing my music for the universe to experience. The music I make is pure. It comes from my total interest in life as well my concern for others and naturalness.
