A voice and style different from the usual fare on today's recordings. He can go from a singer/songwriter baritone/bass to rock and blues to church from one track to the next. Most of all, his songs are songs of conscience-- 17 MP3 Songs FOLK: Modern Folk, FOLK: Folk Pop Details: It seems like we live in a polarized world again. It's nations warring against nations, people hating people, belief systems conflicting with belief systems, families fracturing at the foundations, relationships ending in shambles. Nobody wins. Everyone loses. The alienation of man from God and even self is redefined in the context of a post-modern world. Old social institutions don't seem to work any more, there is the desire to create new ones. I'm one who believes differently. We can love and live in peace. I'm not ready to hand my world over to those who talk big to disguise their fear. These songs explore some of these things. So, what's up with the title "MACNAB"? It's back to the old way--the old Scottish way of spelling the name. Not that they didn't have bloody wars then too. But, you'd think we'd grow out of it. Jim McNabb May, 2004
