With Resell Rights! Easy Split Test Is A SUPER Simple .PHP Software That Takes Less Than 2 Minutes To Setup! Test two or more different versions of your sales page. Split-testing allows you to know which conversions come from which sales page. Easy Split Test even cookies the users computer! Includes Private Label Rights & Graphics Internet Marketing Script #7 Email Router With Private Label Rights! Cut Down The Number Of Spam Complaints From Subscribers That Use Free Email Accounts! Aweber will force your WHOLE account to be double optin (meaning each new signup will have to confirm his subscription) if your spam complaint gets to high. Fortunately you can use the Email Router software to get rid of Spam Complaint headaches. Heres how it works: If any email address is from AOL or Hotmail, it signs them up to 1shoppingcart.com. They have pretty good deliverability, but not as good as Aweber. All other email addresses will be signed up with Aweber.com... saving you a TON of Spam Complaints from the heavy spam button hitting email users. NOTE: It might be possible to edit this software to work with other Autoresponder companies, but we do not recommend it or provide documentation for it. We recommend you simply setup an account with 1shoppingcartand aweber Includes Private Label Rights & Graphics Internet Marketing Script #8 Mass URL With Private Label Rights! Shrink Your Long Links Using

The Mass URL Software! Have you ever used TinyURL to mask your affiliate links or post on to shorten a long URL for Twitter? You simply enter the affiliate URL and it gives you a short one you can add to an email. But there are a few BAD things about TinyURL: 1. The TinyURL domain is blacklisted. That means if you use that URL in an autoresponder email, it will most likely end up in the spam box. 2. If you want to make a LOT of URLs (for example, if you had 15 clickbank affiliate links you wanted to make tiny) then it takes a long time. 3. When you use a service like TinyURL, they can see ALL the traffic going to and from that link. They can even find competitive data like where the user came from, what type of web browser they were using, what country they live in, etc... This probably isn't a HUGE issue with TinyURL, but it's nice to keep things as secure as possible. MassURL takes care of ALL these issues. MassURL is hosted on ANY domain you choose, and you can use it on as many as you like. NOTE: To use MassURL, you will need a server that supports .htaccess. Please call your hosting company to verify your server works with .htaccess. Includes Private Label Rights & Graphics
