Aier Sauft's "Electrobeklash" provides a complete listening experience. It's a mash up of electro-breaks merged with the synth and vocoder sounds of yesterday. If you grew up dancing to 80's music then this album is for you. 16 MP3 Songs ELECTRONIC: Breakbeat/Breaks, POP: New Wave Details: Aier Sauft was formed as an international effort by a couple of electronic musicians who have a distinct fetish for machines and synthesizers. Aier Sauft is an electro-break beat group consisting of two members. JR comes from a technical DJ/producer background while KK fills in the gaps with his musical know how. They both write and record music, together, exclusively as Aier Sauft. With over 14 years of DJ experience, Aier Sauft offers an exclusive solo DJ set featuring all original music composed and recorded by Aier Sauft at Rizatek Studios and performed live on the turntables by JR. In addition a live set is also available for larger venues, with JR singing vocals and KK on the keyboards. The subject matter of the Aier Sauft sound is sometimes regarded as taboo, and carries a feeling of sadness with a twist of absurdity. It is often referred to as a juxtaposition of genres and can not be defined by one style of music. The members, being from such different musical backgrounds, give Aier Sauft a unique sound that has sparked a new self proclaimed genre known as electrobeklash. Featuring blends of electro, house, break beat, synth pop, new wave and more, Aier Sauft combines catchy dance grooves with hard driving dance floor beats and haunting vocals that take you on an emotional ride, making you wanna move.
