A conglomeration of lo-fi pop, country and western, and vocals registering somewhere between Roy Rogers and Sufjan Stevens, Black Golden Bull layers sad and lonely landscapes with those archetypal symbols that permeate our favorite stories. 10 MP3 Songs POP: Folky Pop, COUNTRY: Cowboy Show all album songs: Black Golden Bull Songs Details: Black Golden Bull joins the burgeoning singer/songwriter collective with its conglomeration of country and western (the good kind...), low-fi pop, and vocals registering somewhere between Roy Rogers and Sufjan Stevens. Heavy on imagery and sad and lonely landscapes, BGB layers seemingly simple lyricism with those archetypal images and metaphors that permeate all of our favorite mythologies. (Plus theres some gun-slinging.) With wonderfully simple and singable lyrics suspended above a primary backdrop of acoustic guitar (sometimes the only backdrop), BGB reminds us of what country and western used to be like and how good it was. How it somehow got to the very roots of who we are. Especially those of us blessed enough to have been formed by the gently rolling hills and seemingly endless prairies of the Midwest. Yet, all the while, they maintain a pop sensibility that weaves together a achingly beautiful mixture of unlike genres. A note from the label: At Non Entity Labs, were not interested in faces, egos, photos of faces on covers of magazines, (un)interesting poses, et al. We are, however, interested in beautiful sounds, good intentions, a desire to make something without the need for validation, the value of metaphor in our daily lives, and so on. We're not trying to be cool or obtuse or artsy, here. And we dont take ourselves too seriously. But we take the idea of being a non entity very seriously. Black Golden Bull is a perfect example of a non entity. Black Golden Bull doesn't actually exist. There's just these conglomerations of sad sounds (that we happen to love) floating in space, both cyber and beyond. You won't see names and photos of bearded faces (we imagine them bearded) in the liner notes. Just some pertinent info. We're not here to get

famous or make anyone else famous. We just want to make something and maintain some integrity in the process. BGB is often compared with the likes of Sufjan Stevens, Ray LeMontagne, Johnny Cash, Nick Drake, Elliott Smith, Sons of the Pioneers, and the like. Which is great for us, because we were huge fans of all those folks and more.
