Details: Eclectic might be the word. Certainly not a CD where one hit is repeated 12 times. From the rolling waves of a Jazz based " South Beach " to the esoteric " In Our Dream " A nod to "old Blue Eyes " with his long term wisdom of Romance in " Sinatra Knew " then a tribute to the old master " Thank You Louie " Armstrong embedded in old dixie blues. A resemblance to the old Jazz player downtown as he lives the "Straight Ahead Cat " Cuddle up with a good book in front of the fireplace as the snows gently falls and dream with " Winter " and the emergence of a cleansing better time ahead. Listen to the suggestive poetry in "Colorado Moon " and know you must go there someday. End with the pulsing " Take Control " which screams for the American population to become more aware and involved with a political system which needs to evolve and mature."Is that Bill Clinton I hear " Maybe this CD involves more than you expect because it expects you to be involved as well. A long overdue collection from the living Erik Satie and the more than life Debbie Lease. Enjoy. reviewed by the " New Voices in the Mountains."
