Experimental ethereal drone, boundless space, underwater abysses 5 MP3 Songs ELECTRONIC: Soundscapes, ROCK: Post-Rock/Experimental Details: "Minimal moods coalesce like fog drifting through subterranean tunnels. Soft basslines seep with ethereal atmospherics, producing a soothing anticipation. Tenderly trickling waters float into view. The thoughtful mists gradually become inhabited by lightly echoing strummed guitar which persists in a remote presence as if the instrument lurks just ahead around a bend in the passage. This just-out-of-reach impression permeates the entire release. Despite the sparse nature of this tuneage, the music tingles with a romantic intimacy. Unhurried compositions combine delicate haunted guitar sounds with tenuous ambience to generate the sonic disposition of darkened rooms full of loving caresses." -sonic curiosity soniccuriosity.com/sc189.htm
