This is what you'd get if James Taylor ran into John Hiatt with David Gray playing on the radio... 11 MP3 Songs FOLK: Modern Folk, ROCK: Americana Details: Recorded over the summer and fall of 2003, "Superhero" is Joe Brack's follow up to the 2001 release: "Stones Throw Away". The new record contains the mix of Americana, Modern Folk and Roots based qualities that made the debut effort such a success. As with "Stones Throw Away", the foundation and focus of "Superhero" remains squarely on the songwriting. Joe once again tackles all aspects of the latest record by being the sole writer, musician and producer. Joe explains... "It takes a lot out of you and can become overwhelming at times, but there's a certain satisfaction that comes with making every piece of the music your own".
