Featuring soaring vocals by Lucy Bugiel, this is set to achieve anthem status and is guaranteed to move any dance floor. Lucy is new to the dance scene, but surely not for long. Supporting the vocals is a phat solid trance tune with big beats and wicked melodies, which have all been proven on the dance floor to move feet, bodies

and minds. -- Smoother Mix This builds superbly with interlocking melody lines and, of course, Lucy's vocals up to a powerful and seriously danceable vocal trance anthem. Not heard on the 2min sample on the right is the gated chord progression with soaring synth lines....you'll just have to purchase it to hear it! (If you like the first half you won't regret it!) -- Harder Mix Building from a vocal break near the beginning to introduce the vocals and bassline, this mix has tough intelligent percussion and a searing melody line to compliment the vocals. This one is for the top of the night. Notch it up a couple of bpm - bring it on! The Radio and DJ Edit are identical except the DJ mixes have longer intros and outros for DJs to mix with. Oli Freke, 'Lithium' Comes with all Oli's signature trademarks: uplifting melody, phat beats, and attention to detail in the production. Always gets those feet moving!
