GOSPEL: Contemporary Gospel, ROCK: Modern Rock Details: Like guitars and music with a message?
Seth and the Intervention Band continues to deliver on every CD purchased. Jesse A. from Nashville, TN says, "This CD has lots of staying power! Every listen gets better and better". This special '05/'06 release is the band's second recording. The songs are a compilation that the Band has been working on since their last recording in 2002. Enter producer Mark M. from across the pond (Ireland). Mark's unique ability to interperate songs done by Seth and the Band are sounds reminiscent of their first recording . You can STILL hear the earthy acoustic guitars pound away on a custom Martin D16 and a Vintage '73 Gibson. Is that "The Edge" playing electric, or simply a flair for the dramatic? "Reach" is a great follow-up to Band's first recording. Although this CD does not specifically deal with "Recovery", it IS what this band IS. Truth in advertsing is a precious commodity. Charlie M, manager of a local print shop in Kingston, MA says, "I have loaded it on my new MP3 player, and keep on listening...Great job!" Like "recovery...steps", this CD deals with modern issues that face people in from every walk of life. It encourages the listener to keep looking for God in all of life's circumstances. Reach for it today!
