

Mp3 Celadon - Post-industrial Delicacies

[DOWNLOAD HERE](#)

Dark, textural industrial soundscapes. This debut album ranges from ambient noise to midtempo electronica with a lush, unique sound. 8 MP3 Songs ELECTRONIC: Industrial, ELECTRONIC: Experimental Details: My goal is to express the wonder I feel for the world - its beauty and its darkness. I construct my music mostly from found sounds, twisted and bent into pleasing shapes. The music is deep and dark, but not, for the most part, angry. Post-Industrial Delicacies is my first solo CD. I have also worked on a number of collaborative efforts, remixes, and the like. I am currently playing live at various venues in Seattle and Portland, mostly with my experimental improv group In the Deep Museum. Please check out my Web site for more details.
