

Mp3 Jasonsongs - Brain Jam

[DOWNLOAD HERE](#)

Kids music like you've never heard it before with lots of variety and sympathetic to the adult ear. 10 MP3 Songs KIDS/FAMILY: Kid Friendly, POP: Party Pop Details: Jasonsongs is basically the alter-ego of Jason Arvanites along with his wifey-poo Elaine. Making music together for the past 20 years. "Brain Jam" is the start of a series of albums intended to celebrate the cerebellum, motivate the medulla, and coax the cortex. Each song falling into one or more of the areas known as the "Four F's"; Fact, fantasy, feelings fun. It's also a trip around the world. Visiting different cultures and people that make life all the more interesting. A brief summary: Pompton Princess: This is a song I wrote for my bride-to-be way back in 1983. It contains a lot of imagery and evokes pleasant feelings. Wash Your Hands: This was inspired by the fact that we all should. Note: It's not just for employees. And you can take that from Ranji. Make Friends with the Bugs: I've seen some people so afraid of these tiny little guys that they could have won a gold medal for the gymnastics they performed attempting to get a grasshopper off their shirt. Chores: Not a word we like to hear very often. But if everybody did their chores don't you think things would run a lot smoother. Just ask Jamaica Joe. Folk Song: If we have the benefit these days of having parents who love and care for us, don't they at least deserve to know that we appreciate it? Can I get an eye? Dinosaur: What is it about a dinosaur that is so fascinating? They disappeared so long ago and yet we keep digging them up. Love Your Neighbor: If everybody followed the "Golden Rule"; ("Do for others what you would have them do for you.") this world would be a much better place. Vacation: In my experience, the anticipation of going on a trip is always more exciting than the actual vacation. All that went through my head, when I wrote this, was two kids bouncing on their beds. Yelling at the top of their lungs. Funny Noises: Let's face it. We all make them. They all make us laugh. And there's nothing we can do about it. Yeeha! Mongo, Mongo Meat Muffins: This started out as a phrase I would blurt as I walked about the

house. It had no real significance. It just became such a part of me that it was only natural to turn it into a song. And, of course, food is a topic nobody can resist. Wundervoll! It is our sincere desire that you have a great time listening to and dancing along with our music. Have a good time. And keep that Brain Jammin'!
