I create the space for people to tell their own stories, to feel their emotions, and to connect with the source of their life's pain and beauty. I use music and sounds to create an experience for the listener to be free to feel what they need to express; fear, sadness, pain, joy, delight, faith, hope, love. My music becomes an agent of healing for the life of the world, because it allows people to be present to their own emotions. My sounds provide a safe place for them to explore the depth of their feelings and to become aware of what their souls need to express.
