DOWNLOAD HERE

A Unique Acoustic Jazz and Blues combo with excellent Trumpet work 12 MP3 Songs in this album (49:34) ! Related styles: FOLK: Folk-Jazz, JAZZ: Jazz-Rock People who are interested in John Mayer should consider this download. Details: On the Road is a CD that developed as guitarist, songwriter, singer Tim Pepper and trumpet player, percussionist Brian Warner began to perform live in coffeehouses. The songs actually came to life as they practiced on a regular basis and then performed them on the weekends on the coffeehouse circuit. So where do I start? We love to perform music. We have absolutely had a great time playing all over Michigan and into Ohio and Indiana. We strive to bring a high-level of professionalism and versitality to all of our gigs. We want to help people discover a fresh and new sound in music. We bring a unique and original sound by blending Acoustic Guitar and Electric Guitar with the Trumpet and many percussion insturments that help to give a greater expression of our music and creative art. We are just a couple of blue-collar workers who love to play music. Though we dont really do this for any personal gain or recognition, we just love playing music. We find that CDBaby is a great information touchpoint as well as live gigs are to connect people with our creative art. Our plan is to encourage and inspire people as we perform our music in many settings.
