

Hot Or Not Clone Script Software

[DOWNLOAD HERE](#)

This is a clone script (written in php) of the famous Hot or Not system, with the same features and options, and a VERY similar appearance. The users are able to upload their photos and vote from 1 to 10, pictures uploaded by other members. The registered users have the option to send private messages to each other and leave comments about the photos. It can also be included a module with the most voted photos.
