Combined with the musical mastery of producer and Sony recording artist Casey Stratton, Mia Skye has created a style that introduces the folk generation to the ever-evolving electronic music that has exploded upon the music scene over the past decade. Mia's emphasis on creating lyrical depth that stimulates the mind, provides for the perfect balance to her innovative music style. By examining the issues that everyone is faced with, but often turn their back to, Mia has given a voice to all of those who have tried to decipher the inner conflicts of life. Stratton became involved with Mia early in her musical career and has praised "Firefly Diaries" as an album that will change the face of popular music. "Mia's forthcoming album is amazing to say the least. The songs are beautiful and thought provoking, fresh and different," said Stratton. "There is an emotion that this album brings forth that is extremely peaceful while being edgy, and the songs have such depth. You will find that this album will be in your players for a long, long time," Stratton continued. Stratton has worked in the past with artists like Carnie and Wendy Wilson of Wilson Phillips and recently opened across the country for Sophie B. Hawkins. Mia, who also opened for Stratton at Fez in New York, has a love for the stage. Having been involved with the performing arts since her childhood, Mia Skye has the ability to enthrall her audiences, captivating them with an experience that etches a spot in their memory forever. Fred Anguera of Iron Bed Productions who attended Mia's recent New York performance, praised Mia saying, "Mia's

music and voice captivated the audience and myself at the New York show. Her music and voice definitely told us something...we listened and got the message. It was a wonderful experience."
