m/n/m/1

Brute experimental electronic music. The stuff you love but rarely find. Beautiful, surreal, brutal. 10 MP3 Songs ELECTRONIC: Experimental, ELECTRONIC: Ambient Details: thanks for stopping by. this is my 3rd CD. a year and a half in the making, more daring trips into electronic noise and sound. this is music that I look for and never find. experimemental and daring, not dry, academic, or pop. it screams! the sounds are painstakingly developed and molded into surreal dreamlike episodes. some were done in realtime, some were multitracked. the only instrument used is the Serge Modular Synthesizer - no MIDI. This is surreal sound on the ragged edge of music. You won't find any standard time or scales here. The structure comes from inside the sound. lots more info on this and my other CD's on my main website. like with my other CD's here, 10 of sales go to worthy causes.
