

# Modern Testing Techniques For Structural Systems

[DOWNLOAD HERE](#)

The articles in this book describe new developments in the area of structural testing, particularly those based upon the principle of fusing numerical and experimental methods such as real-time dynamic substructuring and hardware-in-the loop testing. In addition to the hybrid methods, chapters on the latest developments in more established techniques, such as shaking table testing, provide a completely up-to-date survey of structural testing methods. EAN/ISBN : 9783211094457 Publisher(s): Springer, Wien
