There live shows have been described as "wonderfully acerbic" by the Rocky Mountain News. Here are some song reviews of the new CD Mixed Up. "Let it Go" from Mixed Up Great song This is one of the best songs I've heard everything is great about it. The country type riffs. The jimi esque riffs. The vocals.

Its all great guys. Please email ur info. I want to hear more. And def. see u live. - blacktierock Phoenix, Arizona Country and then? Nice intro, threw me. Excellent production, love the vocals. Superb bass and great guitar sound. My main pet peeve is lack of energy in performances. But this is drooling in energy. I want more. Mixed Up strangely upbeat Standard sound put together in original way! The hook is uniquely catchy. The production seems a little unbalanced, and the lyrics?!?...also unique. I can't put my finger on it...but the arrangement is random to me. But you made me listen to it twice so I guess it's intriguing...or short ;)

Good job. - Pharmacopeia Sioux Falls, South Dakota Check us out! Download some songs. You haven't heard a CD like this.
