"Here Is How You Can Easily Deploy Fully Search Engine Optimized WordPress Blog That Drives Tons Of Targeted Traffic To Your Niche Sites Without Spending A Dime On Advertising" When I first started blogging for cash I didn't know how to optimize my WordPress blog for search engines. I would just use the out-of-the-box installation and start making posts without doing any kind of optimization. My first blogs would never get the traffic I was going after, and I was always wondering what in the heck was I doing wrong? I used to look up in Google some cool high traffic blogs and could never figure out how others did it. I wanted to know what was the magic formula to get my blogs ranked high in search engines. After a while I realized that my blogs were nowhere near optimized as good as some of those authority blogs, that I have seen on the front page of Google for hundreds of keywords. They had better in-depth linking structure, meta tags, more pages, and Google would index their pages almost instantly! I wanted to be able to build those authority blogs that would drive more highly targeted traffic to my sites so I could make more money. So..then I started researching and experimenting different WordPress plugins, blog set ups, and coding. With time my blogs started to pull more and more traffic, and I was able to make more money each and every month. I finally cracked the WordPress code and found the magic formula I needed to get my blogs on top of the search engine rankings, and get more traffic. I started building blogs that Google would index much faster, and every time I would make a post it would appear in the SERPS almost instantly. My traffic stats exploded and my niche sites started to produce more income. To help some other folks out there, I decided to create cool step by step videos that you can watch and follow to install your own high traffic niche blogs. I have produced 7 Camtasia videos that you download or watch online. Let's go over each one of them... Video #1 - Install WordPress Part 1 In this video I am going to take you step by step through the entire process of setting up MYSQL database and configuration settings. Installing WordPress is very easy, but there are still folks out there that are having trouble with it. Video 1 & 2 will have your blog installed in less than 15 minutes. Video #2 - Install WordPress - Part 2 In this video I am going to show you how to upload all the files on your server and proceed with the installation process. I am also going to go over some post-installation settings that need to be done before any

further modifications. Video #3 - Theme Settings & SEO Plugin Installation Here you are going to find out how to set up your blog for maximum seo benefit and how to install the SEO plugin on your WordPress. I am also going to show you how to make your WordPress ping Weblogs and what services you should include. Video #4 - Customizing The SEO Plugin This video is going to take you over some of the options and settings that you need to customize for your blog. Video #5 - Installing Google Sitemap Plugin And Optimizing It In this video I am going to show you where to find and how to install the Google Sitemap plugin on your blog. I am also going to go over some cool optimization tips of the plugin. Video #6 - Installing Related Posts Plugin & Customizing It You are going to find out where to download the plugin for free and how to install it in less then 5 minutes. This video will show you how to set up better in-depth linking structure on your blog. Video #7 - Installing A Killer Plugin That Will Allow You To Generate More Pages On Your Blog This video is going to reveal an awesome plugin that is going to have a huge impact on your blog's performance. I will go over the installation process and customization. Tags: mrr
