My musical prowess began in the days of listening to great music with my older brothers, sisters and our friends back in the early to mid-1970's. We had the ultimate music menu of all time, in my opinion, for pop and rock music via albums, 8-track tapes and radio. I began playing guitar and drums at age 13 and became a semi-schooled drummer, then it was several years later that I took up piano. At that time I decided to follow my heart and attempt to quench my thirst for music so I began diligently studying guitar as well as piano and writing music. At that point I wanted to put some songs together for a CD and finally, here it is...my first composition of original songs! These are songs which derive from my life and from my imagination. I am fond of this CD because it is the end result of a goal and a vision. It took alot of work and diligence from concept to finished product, but it has been very rewarding and well worth the effort. This will surely be the first of many more projects to come. Please listen, enjoy and thank you for your support.
