

Mp3 Sonaura - The Lights Behind Us

[DOWNLOAD HERE](#)

The ethereal soundscape of a starry night. A meditative yet engaging listen. 6 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Soundscapes Details: 'The Lights Behind Us' is a cosy and warm, yet spaced out Debut EP from Sonaura. For 30 minutes you can easily forget where you are and let Sonaura take you from sunrise glows, through the starry depths of space and safely back to a warm log fire. The music was all recorded on 4 track cassette and features soothing keyboards, sunburst guitars, electronic and acoustic drums and ghostly yet intimate vocal lines textured by distorted samples and various household objects. Mainly based on meditative drones with simple melodies floating on top, the subtle counter-rhythms in the samples, vocals and basslines give the music a truly free and relaxed feel. Originally the concept for Sonaura was initiated and inspired by the writer's 3 year old son, and a lot of happy accidents whilst experimenting. Now it has become a realised project for the artist, we at The Mentalist Association look forward to delivering more of Sonaura's work in the future. In the meantime, this EP is altogether an intriguing introduction to the world according to Sonaura.
