Color Clickz Handy Color Picker Who Else Wants To Learn The Hidden Secrets Of Every Single Color Straight Off Your Screen Through A No-Nonsense Super Handy Color Picker? Cutting-edge web site design is not limited to the bells and whistles of layouts, but includes elements like font, size, frames and most importantly, colors. Dear Friend, Colors affect the aesthetic sensibilities of the users; they can either immediately hate or love your website because of the colors you use. The warmth and feel of your web site - its ambience - is a fundamental factor that captures on-line visitors to your e-commerce portal. It either invites or dissuades their attention. Pixels, backgrounds and foregrounds, use of geometric figures, and in terms of shape, size, color, contrast and appeal characterize a web page's texture. Photographs and halftones provide your web pages with a cheerful dimension. All these have to work in perfect harmony to create a captivating and engaging visual delight. Color and texture has a tremendous impact on users emotionally because the best texture and color combination is not only seen, but felt as well. This is why users unconsciously develop an unexplained attraction to a web site, and choose to lengthen their stay. Although there is no single bullet formula to guarantee that everybody will feel the same towards a particular web site with a particular color scheme, there are color guidelines and techniques that have a favorable influence in a web site's overall appeal to users, which you can use to your advantage. It's Quick, Easy And Step-By-Step Color Clickz V 1.0 provides you with the capability to pick and capture a single color off a gradient even if it is less than 5 pixels. Color Clickz makes picking a color off the screen as easy and simple as moving the mouse over the area of the screen and allows you to single out each and every color that makes that "hard to get gradient" easy to reproduce! Color Clickz gives you the capability to capture any color off your computer screen fast and easily with just a few clickz

regardless if there are 256,000 shades of a single color! Having the advantage of Color Clickz in your color-and-design critical web site design projects already cuts your research time in half, allowing you to use your time more efficiently. ColorClickz is one of the color tools that will enhance your knowledge of using colors strategically to your advantage and influencing your clients' decisions! It will separate you from the field and keep you ahead of the competition - anytime, all the time!
