Experimental electronic music that will keep you dancing all night long. Not boring and repetitive. 11 MP3 Songs
ELECTRONIC: Experimental, ELECTRONIC: Techno Details: THIS CD IS OUT OF PRINT, BUT HAS BEEN COMBINED WITH THE FIRST "WHERE'S KITTY?" CD AND RELEASED ON ONE DISK. AVAILABLE AT THE FOLLOWING SITE: cdbaby.com/whereskitty3 Where's Kitty is an experimental/dance electronic project that was created in 2000. These songs will not bog the listener down with repetitive beats and loops; there are many changes and detours introduced to keep the listener interested and inspired. Tempos, time-signatures, and complete sections of music twist and turn, stop or begin unexpectedly, keeping the listener's attention, never knowing what direction the music will take next. This music is an odd journey through a kalidescope of imaginary colors, that will keep you dancing all night long. If you like the band GWAR - then be sure to check out "sick of you" which is an electronic cover of the GWAR song by that same name! This album, as well as Where's Kitty?'s first album ("where's kitty?") were the first flirtations with electronic music by their creator, A (aka Where's Kitty?). They are cartoony, dancy, quirky, and contain subtle experimental shades. Where's Kitty? is currently working on a third release.
