

Mp3 Selena Harrington - Tiny Places

Strong female Vocals, Strong melodies. I love a good melody like Neil Finn (Crowded House), Elliott Smith and the Beatles. My voice has been compared to Sheryl Crow and Chrissie Hynde...you decide. 10 MP3 Songs ROCK: Acoustic, FOLK: like Ani Details: Tiny Places is my second CD release. This time, I worked with Ian Button (guitarist, Death in Vegas), Sean Read (piano/keyboards, Beth Orton) and 20goto10 (Ether), to produce these 9 tracks. I used more real instruments on this album as opposed to the more electronic production on my previous release, Montana Hi-Rise (cdbaby.com/montanahirise). The songs are still melodic and emotional...still with powerful, gravelly (and smooth) vocals. The songs talk about finding yourself, hiding from the world, drugs and a wee bit of lurve. It's been a long journey to get to this point and to get this album out. I hope you enjoy it!
