A unique blend of contemporary Neo-Classic Soul and R&B from South Africa's most exciting musical export. 14 MP3 Songs URBAN/R&B: Neo-Soul, URBAN/R&B: Rhythm Blues Details: In 2004, Musicians, Shaun Parsons, Clint Brink, Kenton Windvogel from Johannesburg, Cape Town, Durban respectively, formed the band, SoulStone. Beyond the culmination and diversity of influence, the album, "MusicLoveTruth" was conceived spawning the current top 10 single, "Now That Your Love Has Gone". In addition to Producing, Writing, Arranging, Composing and Performing, SoulStone Music Production as an Indie label, has been tasked with handling the Promotion and Marketing and Imaging aspects of the album. SoulStones sound is heavily influenced by great musical pioneers Donny Hathaway, Marvin Gaye, Stevie Wonder, Prince, George Benson with the youth and exuberance of local and international artists and bands such as Jonathan Butler, Brian McKnight, Mint Condition, The Dave Mathews Band, Boyz II Men, Dangelo and many more. Not limiting their creative hunger for musical excellence, SoulStone as a band, also reproduces sounds of Reggae, Jazz, Rock, Pop, Neo-Soul and R&B with effortless transition. CD Review: Channel-O I have mad respect for R&B music but it takes a lot to impress me. Some of the stuff out there is enough to put anyone off spending their money and purchasing a CD in the name of supporting our local music, but with the release of Music.Love.Truth there might just be hope after all. Apart from their harmonizing vocals, what differentiates this group from all the other has-beens - as well as those irritating wannabes - is the fact that Soulstone's sound is at a standard that is beyond our borders - at first listen I thought they were an act from the US. The trio fuses a soothing mixture of piano, keyboard and drums and Kenton kills it with his mean guitar-playing skillz. Tracks to look out for include the power ballad of our time Now That Your Love Has Gone, Give It To You Right, which features O's very own ProVerb, Did'n I ?, Deserve Me and the addictive party track In The Club. The album drops this

year in September. Soulstone is here to infect R&B with a much needed dose of nothing but pure soul
