

Mp3 The Slides - The View From Here

[DOWNLOAD HERE](#)

The Slides write all about life, love and everything in between - great songs played by the people that write them. 10 MP3 Songs POP: with Live-band Production, ROCK: Acoustic Details: Welcome to the CDBaby home of The Slides! In the eighteen months since their formation, this tireless threesome have hit the streets bringing their enigmatic sound and adult-alternative, indie rock style to their seasoned band of fans. Combining a healthy dose of barefaced honesty, with a modern pop sensibilities, The Slides have drawn an evident influence from the likes of Neil Finn, Coldplay, Wilco, and Radiohead. With the aptly titled full length debut effort *The View from Here* released nationally in Australia through Reverberation in March 2006, The Slides have hit the ground running with an unapologetic yet earnest look at life, love and everything in between. A true feat for this talented trio, whose soul-selling antics have seen them literally crossing borders in an unorthodox departure from the standard EP for a first independent release. Recorded in Australia by award winning engineer Dave Neil, and mixed at the legendary Rockinghorse Studios by Anthony Lycenko (Pete Murray, David Bowie, Elvis Costello, Moloko) the record is no amateur effort. Featuring the unquestionable talent of Damon Fealy (lead vocals/guitar) Lincoln Retallack (bass/vocals) and Michael Grabbe (drums/vocals) you wont find these three lads lax in commitment or ability, having worked alongside some of the music industrys local luminaries and international idols, including Blondie, Taxiride, Jimmy Barnes, Ice Cream Hands, The Anyones, Dieselthe list goes on. Listen to the record...visit the website...drop them an email...chalk it up on your list of "Sterf to do Before I Quit This Party" and brighten your day!
