

Topological Degree Approach To Bifurcation Problems

[DOWNLOAD HERE](#)

1. Introduction - 1.1. Preface - 1.2. An Illustrative Perturbed Problem - 1.3. A Brief Summary of the Book -

2. Theoretical Background - 2.1. Linear Functional Analysis - 2.2. Nonlinear Functional Analysis - 2.2.1. Implicit Function Theorem - 2.2.2. Lyapunov-Schmidt Method - 2.2.3. Leray-Schauder Degree - 2.3. Differential Topology - 2.3.1. Differentiable Manifolds - 2.3.2. Symplectic Surfaces - 2.3.3. Intersection Numbers of Manifolds - 2.3.4. Brouwer Degree on Manifolds - 2.3.5. Vector Bundles - 2.3.6. Euler Characteristic - 2.4. Multivalued Mappings - 2.4.1. Upper Semicontinuity - 2.4.2. Measurable Selections - 2.4.3. Degree Theory for Set-Valued Maps - 2.5. Dynamical Systems - 2.5.1. Exponential Dichotomies - 2.5.2. Chaos in Discrete Dynamical Systems - 2.5.3. Periodic O.D.Eqns - 2.5.4. Vector Fields - 2.6. Center Manifolds For Infinite Dimensions - 3. Bifurcation of Periodic Solutions - 3.1. Bifurcation of Periodics from Homoclinics I - 3.1.1. Discontinuous O.D.Eqns - 3.1.2. The Linearized Equation - 3.1.3. Subharmonics for Regular Periodic Perturbations - 3.1.4. Subharmonics for Singular Periodic Perturbations - 3.1.5. Subharmonics for Regular Autonomous Perturbations - 3.1.6. Applications to Discontinuous O.D.Eqns - 3.1.7. Bounded Solutions Close to Homoclinics - 3.2. Bifurcation of Periodics from Homoclinics II - 3.2.1. Singular Discontinuous O.D.Eqns - 3.2.2. Linearized Equations - 3.2.3. Bifurcation of Subharmonics - 3.2.4. Applications to Singular Discontinuous O.D.Eqns - 3.3. Bifurcation of Periodics from Periodics - 3.3.1. Discontinuous O.D.Eqns - 3.3.2. Linearized Problem - 3.3.3. Bifurcation of Periodics in Nonautonomous Systems - 3.3.4. Bifurcation of Periodics in Autonomous Systems - 3.3.5. Applications to Discontinuous O.D.Eqns - 3.3.6. Concluding Remarks - 3.4. Bifurcation of Periodics in Relay Systems - 3.4.1. Systems with Relay Hysteresis - 3.4.2. Bifurcation of Periodics - 3.4.3. Third-Order O.D.Eqns with Small Relay Hysteresis - 3.5. Nonlinear Oscillators with Weak Couplings - 3.5.1. Weakly Coupled Systems - 3.5.2. Forced Oscillations from Single Periodics - 3.5.3. Forced Oscillations from Families of Periodics - 3.5.4. Applications to Weakly Coupled Nonlinear Oscillators - 4. Bifurcation of Chaotic Solutions - 4.1. Chaotic Differential Inclusions - 4.1.1. Nonautonomous Discontinuous O.D.Eqns - 4.1.2. The Linearized equation - 4.1.3. Bifurcation of Chaotic Solutions - 4.1.4. Chaos from Homoclinic Manifolds - 4.1.5. Almost and Quasi Periodic Discontinuous O.D.Eqns - 4.2. Chaos in Periodic Differential

Inclusions - 4.2.1. Regular Periodic Perturbations EAN/ISBN : 9781402087240 Publisher(s): Springer

Netherlands Discussed keywords: Bifurkationstheorie Format: ePub/PDF Author(s): Feckan, Michal
