Over the past two decades, China's political reforms, open-door policy, dramatic economic growth, and increasingly assertive foreign policy have had an unprecedented regional and global impact. This introductory textbook provides students with a fundamental understanding of government and politics in China as well as the conceptual ability to explore the general patterns, impacts, and nature of continuities and changes in Chinese politics. Further, it equips students with analytical frameworks by which they can understand, analyse and evaluate the major issues in Chinese politics, including: The basic methodologies and theoretical controversies in the study of Chinese politics. The major dimensions, structures, processes, functions and characteristics of the Chinese political system, such as ideology, politics, law, society, economy, and foreign policy. The impact of power, ideology, and organization on different spheres of Chinese society. The structure, process, and factors in Chinese foreign policy making. Whether China is a "strategic partner" or "potential threat" to the United States. By examining contending theoretical models in the study of Chinese politics, this book combines an essentialist approach that keeps focus on the fundamental, unique and defining features of Chinese politics and government with other theoretical approaches or analytical models which reveal and explore the complexities inherent in the Chinese political system. Extensively illustrated, the textbook includes maps, photographs and diagrams, as well as providing questions for class discussions and suggestions for further reading. Written by an experienced academic with working knowledge of the Chinese Government, this textbook will provide students with a comprehensive introduction to all aspects of Chinese Politics.
