

Geodetic Reference Frames

[DOWNLOAD HERE](#)

1;Preface;6 2;Contents;7 3;Session 1 Combination of Space Techniques Convenor: M. Rothacher;12
3.1;Combination of Earth Orientation Parameters and Terrestrial Frame at the Observation Level;13
3.2;DGFI Combination Methodology for ITRF2005 Computation;20 3.3;Combining One Year of
Homogeneously Processed GPS, VLBI and SLR Data;26 3.4;Inverse Model Approach for Vertical Load
Deformations in Consideration of Crustal Inhomogeneities;32 3.5;Station Coordinates and Low Degree
Harmonics with Daily Resolution from a GPS/CHAMP Integrated Solution Solution and with Weekly
Resolution from a LAGEOS-only;39 3.6;Rigorous Variance Component Estimation in Weekly
Intra-Technique and Inter- Technique Combination for Global Terrestrial Reference Frames;47
3.7;Assessment of the Results of VLBI Intra-Technique Combination Using Regularization Methods;53
4;Session 2 Global Reference Frames Convenor: C. Boucher;60 4.1;Contribution of Lunar Laser Ranging
to Realise Geodetic Reference Systems;61 4.2;Vienna VLBI Simulations;66 4.3;Towards an Improved
Assessment of the Quality of Terrestrial Reference Frames;71 4.4;Strengthes and Limitations of the
ITRF: ITRF2005 and Beyond;77 4.5;The International Terrestrial Reference Frame (ITRF2005);84
4.6;Effects of Different Antenna Phase Center Models on GPS-Derived Reference Frames;86
4.7;Influence of Time Variable Effects in Station Positions on the Terrestrial Reference Frame;92 4.8;The
Actual Plate Kinematic and Crustal Deformation Model APKIM2005 as Basis for a Non-Rotating ITRF;97
4.9;Control Measurements Between the Geodetic Observation Sites at Metshovi;102 4.10;VLBI-GPS
Eccentricity Vectors at Medicina's Observatory via GPS Surveys: Reproducibility, Reliability and Quality
Assessment of the Results;108 5;Session 3 Regional Reference Frames Convenor: Z. Altamimi;114
5.1;The Practical Implications and Limitations of the Introduction of a Semi-Dynamic Datum A New
Zealand Case Study;115 5.2;Evaluation of Analysis Options for GLONASS Observations in Regional
GNSS Networks;121 5.3;The European Reference Frame: Maintenance and Products;130 5.4;The
EUREF Permanent Network: Monitoring and On-line Resources;136 5.5;Noise and Periodic Terms in the
EPN Time Series;142 5.6;Long-Term Densification of Terrestrial Reference Frame in Central Europe as
the Result of Central Europe Regional Geodynamic Project 1994-2006;148 5.7;A First Estimate of the

Transformation Between the Global IGS and the Italian ETRF89-IGM95 Reference Frames for the Italian Peninsula;154 5.8;Achievements and Challenges of SIRGAS;160 5.9;The Position and Velocity Solution DGF06P01 for SIRGAS;166 5.10;Using an Artificial Neural Network to Transformation of Coordinates from PSAD56 to SIRGAS95;172 5.11;CPLat: the Pilot Processing Center for SIRGAS in Argentine;178 5.12;Realization of the SIRGAS Reference Frame in Colombia;183 5.13;Seasonal Position Variations and Regional Reference Frame Realization;189 5.14;IGS/EPN Reference Frame Realization in Local GPS Networks;195 5.15;Systematical Analysis of the Krueger-Coordinate/DHDN and UTM-Coordinate/ETRS89 in Baden-Wrttemberg with Different Estimation Methods Transformation Between Gauss-;202 5.16;Empirical Affine Reference Frame Transformations by Weighted Multivariate TLS Adjustment;209 5.17;Modified Sidereal Filtering Tool for the Analysis of High-Rate GPS Coordinate Time Series;215 5.18;Questioning the Need of Regional Reference Frames;221 6;Session 4 Interaction of Terrestrial and Celestial Frames Convenor: H. Schuh;227 6.1;Empirical Earth Rotation Model: a Consistent Way to Evaluate Earth Orientation Parameters;228 6.2;A Quasi-Optimal, Consistent Approach for Combination of UT1 and LOD;234 6.3;The Effect of Meteorological Input Data on the VLBI Reference Frames;239 6.4;Estimation of UT1 Variations from Atmospheric Pressure Data;246 6.5;Various Definitions of the Ecliptic;252 7;Session 5 Vertical Reference Frames Convenor: J. Ihde;263 7.1;Strategy to EAN/ISBN : 9783642008603 Publisher(s): Springer, Berlin Format: ePub/PDF Author(s): Drewes, Hermann
